

Living disease **FREE**

LifesMiracle was created by a team of world-renowned health scientists and researchers to bring together in one capsule, the entirety of health-creating abilities found in nature. Just one capsule contains the full universe of healing energy. The LifesMiracle supplement is processed with proprietary electro-magnetic frequencies, which potentiate and electronically supercharge the formula so it resonates with the cell's natural energies for the highest state of nutritional delivery to the body.

The essence-of-life elements are added to surround these life-force minerals to complete the most advanced supplement designed for humankind. The formula has nutrients for the heart, the brain, the bones, the blood, the thyroid, and the immune system. It also has ingredients for dramatic energy, to slow the aging process, unclog arteries, reduce blood pressure and very importantly, to bring your brain back to life so you can think clearer, deeper and with greater memory capacities than ever before.

The core of the formula is a combination of 84 minerals and trace minerals, electronically charged like blood plasma. Second is micro-milled Chlorella, rich in Chlorophyll, which is identical to hemoglobin in the blood. There are 24 amino acids, which are the building blocks of protein and essential for the brain to operate, think and sleep. There's also Pantothenic Acid, the incredible B-vitamin that the Smithsonian Institute said was the crucial ingredient for life to be created in the ancient oceans of old. Without it, no intelligence can be formed in a new cell. The formula contains Niacin, the blockbuster B-vitamin to refresh the brain and boost circulation, lowering blood pressure. There's Calcium Citrate for stronger bones and Vitamin D-3 to convert the calcium so it doesn't sit around doing nothing but gets to work. Also these last two compounds, Calcium and D-3 trigger the body to make its very own chemotherapeutic drug called Calcitriol that in a four-year study at Creighton University reduced the incidence of any form of cancer by a staggering 80 percent.

Also in the formula are: Potassium Citrate, which helps create a heartbeat and is also needed for energy and brain function; and Subultiamine, which is an amazing compound no one knows about yet. It's a member of the B-vitamin family that has a dramatic effect on brain function, clarity of thinking, volume thinking, faster thinking and also a profound, stamina enhancer and energy producer. There's also Glucuronolactone, possibly the most powerful energy producing compound in history, not just on the body but also on the brain. Body

A breakthrough in biochemistry, LifesMiracle recognizes the essential fact of all creation that our bodies are magnificently orchestrated "electrical machines." The core of LifesMiracle formula uses electrically-charged ionic mineral compounds that activate all life processes including those essential to limitless physical well being.

builders swear by it for the way it transforms their body in little or no time at all.

The formula also contains electronically-charged, high Iodine kelp. Kelp, which is from the ocean, is abundantly high in all minerals, vitamins, amino acids and omega fatty acids but is very high in electrically charged iodine. This means it nourishes the vital thyroid gland. Without a healthy thyroid you can't think straight, you can't lose weight, and your immune system becomes weak. Resveratrol is in the formula. It's the new darling in the phytonutrient biotech science circles. It's been hailed as the ultimate fountain of youth compound. It comes from red wine grapes, it dissolves fat in the blood, unclogs arteries and it fights diabetes.

The most celebrated brain/intelligence herb in all Eastern medicine, Ginkgo Biloba, is included too. Ginkgo pumps oxygen into the cells, particularly the brain. L-Phenylalanine, an incredible amino acid that works far faster and safer than any anti-depressant drug, is in the formula too. Watch as your attitude to life and anyone around you changes with this being delivered to the brain each day. Cayenne is also included. It's a superb vacillator, which means it opens up the cells so circulation will increase; this brings down blood pressure instantly. The formula also contains Kokkorokou Ombene, an incredible nut that grows in the jungles of Africa, a cousin of the coffee bean. It contains far higher energy potential than caffeine from coffee.
