

LifesBody™ Product Fact Sheet

Product Description

LifesBody™ is a new, proprietary formula based on University of Pittsburgh data demonstrating the relationship between C-Reactive Protein and leptin levels. It is a safe and natural complex of plant-based polysaccharides, esterified fatty acids, beta-carotene, phenylethylamine, Klamath lake algae, flavonoids, etc. that has been shown to reduce stored body fat and enhance weight loss.

In addition to weight loss and, more specifically, FAT loss, the data has shown an increase in lean muscle mass. These improvements in body composition and percent of body fat are achieved through the interaction between the adipose tissue, brain and liver to control serum leptin levels.

Clinical Results

In an 8-week, Randomized, Double-Blind, Placebo-Controlled Human Clinical Trial, there were significant ($p < 0.05$) reductions in body weight, body fat, total cholesterol, LDL-cholesterol, triglycerides, glucose, and leptin levels in patients who received **LifesBody™** as compared to those on placebo. These reductions were paralleled by an increase in the concentration of HDL-cholesterol.

WEIGHT LOSS – 12.4 lbs.

BODY FAT LOSS – 4.13%

REDUCTION IN WAIST CIRCUMFERENCE – 4.54%

REDUCTION IN SERUM LEPTIN LEVELS – 49.57%

DECREASE IN C-REACTIVE PROTEIN – 29.45%

Recommended Serving:

At a daily serving of only 1200mg, some of the possible structure/function claims that can be made with **LifesBody™** would reference weight loss, C-Reactive Protein, Leptin, Cholesterol, Longevity, Anti-Inflammatory and Cardiovascular Health.
